

A doorbell.

A desk. A teapot.

AI doorbell

01

Camera, vision model, opinions. Texts you who's at the door — and what they're carrying.

Desk tracker

02

A sensor watching your desk. Nudges you when you slump, drift, or leave the kettle on.

Plant whisperer

03

Soil, light, temp. Your basil sends you weary text messages.

Street diary

04

Counts what nobody is counting — birds, cars, footsteps — and writes the day up.
